Assembly Transportation Committee  
California State Assembly

Dear Chair and Members of the Assembly Transportation Committee:

The California Outdoor Recreation Foundation (CORF), a State Parks partner, respectfully submits its support for AB 1613, the Off-Highway Safety and Stewardship Bill authored by Assembly Member Lori Wilson.

California has long been a leader in advancing legislation that promotes safety education and environmental stewardship. While AB 1613 may not be the first initiative of its kind nationwide, we believe its development—through collaboration among diverse stakeholders and a focus on the public interest rather than commercial gain—combined with lessons learned from other states, positions this measure to meaningfully enhance public safety and protect California's natural resources. Importantly, the bill reflects an inclusive approach by addressing the full spectrum of off-highway vehicles, ensuring that safety education and stewardship principles apply broadly across all user groups.

CORF is proud to have contributed to the development of this legislation and strongly urges your support. Safety education and environmental stewardship transcend political divisions and benefit all Californians, as well as visitors who enjoy our outdoor spaces.

Respectfully submitted,

A handwritten signature in blue ink that reads "Jane Arteaga". The signature is written in a cursive, flowing style.

Jane Arteaga
